How to order a custom stand

1) Determine the height of the stand.
 We recommend that you first decide the **over-all** height to which you would like to raise your piece. (For example: a desired height of 29" overall, minus a 21" tall piece, equals an 8" stand.)

2) Measure the bottom.
 Turn your piece over, with the front away from you, and measure each of the sides.

3) If the piece is a Tansu with recessed bottom: Measure the thickness of the sides.
 Some Tansu are flat on the bottom. For these we can create a special tray for the piece to sit in, or the piece can be fastened to a regular base with screws.

4) Determine a style. (See Drawings)
 Under 6" tall = Style "U"
 6" to 15" tall = Style "V"
 Over 15" tall = Styles "W" or "X"

Note: We can install a glass or wood shelf in the lower portion of styles "W" or "X". Please inquire. Custom designs are also available.

5) Material Sizes.
 "Typ" = 3/4" square steel tubing horizontals and 1" square steel legs.

Larger stands usually are made of proportionally larger material, i.e. : 1" horizontals with 1 1/4" legs. Material sizes up to 2" square are available for custom designs.

6) Finishes. Our handmade stands are finished matte black with the baked-on coating known as "Powder Coat". Other colors can be special ordered.

7) Please allow up to one month for completion.

Reference Number:		Piece #1	Piece #2
1) Height	of Stand(s):		
2) Sides	Front (A-B)		
	Back (D-C):		
	Right (B-C):		
	Left side(A-D):		
3) Thickness	Front:		
	Back:		
	Right:		
	Left:		
4) Style	("U" "V" "W" "X")		
5) Material	(3/4x1" = "TYP")		
6) Finish	(Black = "TYP")
